

Security and Privacy

Security shouldn't be an afterthought. Zinc delivers proactive security and control over your organization's data.

Privacy You Don't Have to Think About

Zinc gives administrators full control with customizable management options for business data and security features that are on by default.

Custom Data Storage and Deletion: Control how long you want your data stored

Multi-Factor Authentication: Single-use authentication codes that are email and device-specific

User and Access Management: Easily add, remove or investigate users through an admin panel

Built with the Most Advanced Technology

Zinc delivers end-to-end, military grade encryption, partnerships with the most trusted security and infrastructure companies, and anywhere/anytime reliability.

Certifications from the Most Trusted Organizations

In addition to building a world-class security team that holds itself to the highest standards, we regularly invite respected organizations to review and analyze our product and policies.
